Mr. Thomas J. Watson  
CEO  
International Business Machines (IBM)  
1 New Orchard Road  
Armonk, New York 10504-1722

Dear Mr. Watson:

While researching for a possible internship placement, I discovered the Extreme Blue Technical Intern program at IBM on your website. I know that my experience and love for computer programming, customer service and leadership will become a great asset for the IBM Extreme Blue program in order to solve real life problems.

According to the information available on your website, it is clear that you put a lot of emphasis on innovation. With my ambition, I strongly believe I can bring innovative ideas to the team by using my skills gained from problem resolution competitions and years of programming as a hobby. Your website states that you require 4 months of experience in the field which I do not have but, what I do have is experience with the process involved in the development of large scale programs. I learned this while I took an optional online course during high school. This course asked in a team of two, to make a program and we decided on a battleship program with a functional A.I.

IBM is a company that thrives on innovation and it shows in big scale projects like Deep Blue and Cloud. I will be calling your office next week, but if you have any question, please don't hesitate and call me at (613) 890-1489 or email me at atamb073@uOttawa.ca. I look forward to hearing from you soon.

Sincerely,

Austin Tambakopoulos
